

Dear FCC,
Please allow XM Satellite Radio to continue to provide traffic and weather information. FINALLY, i have found a source of traffic information that i can trust and one that i have come to depend on. The competition delivers frustratingly poor reports that have never once helped my driving experience. The XM service kept me out of a big jam, just last week.

The American system thrives on competition. There is a worrying trend of consolidation on the airwaves. Very worrying. Please stop this trend now.

Sincerely,

Glenn Petry
